VECTORS

$1 \quad 12^{th} \text{ Maths}$ - EXERCISE-10.4

1. Given that \overrightarrow{a} , $\overrightarrow{b} = 0$ and $\overrightarrow{a} \times \overrightarrow{b} = 0$. What can you conclude about the vectors \overrightarrow{a} and \overrightarrow{b} .

Solution: Given

- (a) $\mathbf{a}^{\top}\mathbf{b} = 0$ i. either $\|\mathbf{a}\| = 0$ or $\|\mathbf{b}\| = 0$ or $\mathbf{a} \perp \mathbf{b}$.
- (b) $\mathbf{a} \times \mathbf{b} = 0$ i. either $\|\mathbf{a}\| = 0$ or $\|\mathbf{b}\| = 0$ or $\mathbf{a} \parallel \mathbf{b}$.

But, $\bf a$ and $\bf b$ cannot be perpendicular and parallel simultaneously. Hence, $\|\bf a\|=0$ or $\|\bf b\|=0$.
